

StayTrace - Visual Condition Evidence Report

Project: StayTrace Demo | Room: Room 407
Generated: 2026-09-29T18:24:27

Comparison findings

Object / Region	Status	Confidence	Explanation
change candidate	uncertain	61%	A visual change candidate was detected by deterministic image comparison. Object identity and whether the condition is new, pre-existing, or missing require semantic VLM analysis or manual review.

Claim analyses

No claim analyses have been stored.

Scope note: StayTrace is an evidence organization and visual comparison prototype. It does not determine legal responsibility, causation, or liability.
